1 Introduction

This Process Definition Document (PDD) captures the flow of the Robotics Process Automation (RPA) business process to be developed at TKE from <Jun 2026> by <DHC>. Specifically, this document will detail the existing business process to be automated, the target system utilized within the process and all assumptions that influence decision-making.

Upon agreement from all parties, the PDD will be used as a platform and guide from which the automated solution will be designed. Changes to this business process may constitute a request for change and will be subject to the agreed change management process.

2 Overview

The Job Timesheet Processing automation handles the following key activities:

1. Timesheet Upload: Downloads timesheet reports from VIEW portal, validates and filters data, and uploads to SAP using T-code /TKET/FOT_UPLOADCATS.
2. Timesheet Approval: Approves working times in SAP using T-code CATS_APPR_LITE.
3. Transfer to Job: Posts approved timesheets to cost objects using T-code CATA.
4. Reporting: Generates COFC report and execution summary with uploaded hours, unallocated hours, and error details.

3 Benefits

Process Benefits Statistics	
Average working days per year	96 Days
Average working days per month	8 Days
Time cost per hour in (CNY/EUR/USD)	80AUD/Hour
Number of employees performing the task	1

Average processing time per transaction (Hour)	16 hours per week
Average number of processing items (e.g. 2 files operated one time)	N/A
Average number of work orders handled per month	N/A
Task frequency (e.g. 2 times daily or 2 times monthly)	2 times weekly
Total rework time (Hour)	N/A
Total review/audit time (Hour) (e.g. communications)	N/A
Process Benefits Evaluation	
Process Extend Possibility (Specific/Country/OU)	Branch
Efficiency Improvement (Percentage)	N/A
Accuracy Improvement (Percentage)	N/A
Total Saving Time (Hours/Year)	
2*4*12*8= 768 Hours	
Total Fiscal Benefits (per year)	
768 * 80 = 61440 AUD/Year	
Total Fiscal Benefits (5 years)	
61440*5 = 307200 AUD/5 Years	

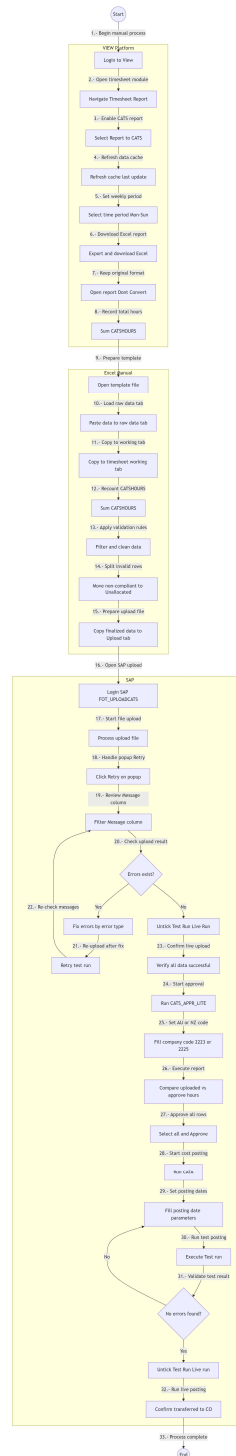

4 Permissions and Authorizations

4.1 Robot Permissions

Platform/Site	Account	Permission(s)
VIEW	S1002314@tkelevator.com	Download document
SharePoint	S1002314@tkelevator.com	Upload data document
SAP	S1002314	Upload data document and execute jobs

5 As-Is Process (Manually)

5.1 Process Diagram

5.2 Process Description

Currently, key users complete sap items manually:

Step 1: Timesheet Upload

1. Log in to View system (<https://au.ap.tkelevator.com> / <https://nz.ap.tkelevator.com>)
2. Navigate to Service Database → Timesheet → Timesheet Report
3. Click Timesheet Report, select "Report to CATS"
4. Click 'last update' to refresh cache
5. Select time period (last Monday to last Sunday)
6. Click Excel icon to export and download timesheet
7. Open downloaded report, select 'Don't Convert'
8. Sum up CATSHOURS
9. Open template file
10. Copy all data from View CATS report
11. Paste into template Excel raw data tab (AU)
12. Keep CATSHOURS sum
13. Copy data from AU tab and paste to AU timesheet working tab
14. Sum up CATSHOURS
15. Data filtering and cleaning:
 - CATSHOURS is 0: move to Unallocated
 - Delete rows where Column I/J and L/M have data
 - Validate Network is 10 digits
 - Validate Activity is 4 digits
 - Correct reversed data
 - When Column L has data, Column M should be 10
 - Filter blank and incorrect items, move non-compliant data to Unallocated tab
16. Copy finalized data from AU timesheet working to Upload tab
17. Log in to SAP, run T-code: /TKET/FOT_UPLOADCATS
18. Fill in parameters as shown and click Process upload file
19. During processing, click Retry when popup appears
20. After test run, filter Message column
21. Keep only "*" Messages processed successfully" / "Record can be processed"
22. If errors exist, check error types one by one and fix:
 - CG5K322200 error: update ACTTYPE
 - Missing labor costing info: move to Unallocated
 - Other error types: handle accordingly
23. Retry test run until no errors
24. Untick Test Run and execute Live Run
25. Verify all data processed successfully

Step 2: Timesheet Approval

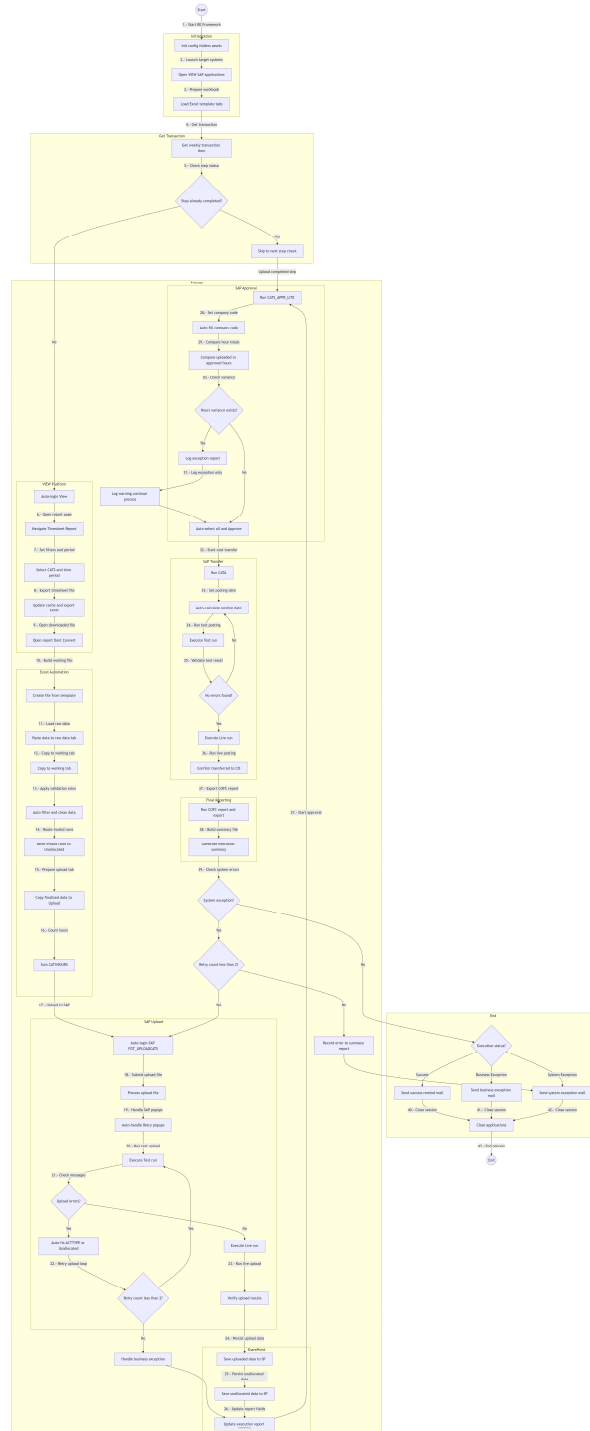

1. Run T-code: CATS_APPR_LITE
2. Fill in parameters (Company Code: AU=2223, NZ=2225)
3. Execute report
4. Scroll to bottom to see hours to approve
5. Compare uploaded hours with hours to approve (should be similar, 1-2 hours variance acceptable)
6. Select Column A first cell, Ctrl+A to select all
7. Click Approve button
8. Confirm approval completed

Step 3: Transfer to Job (Post to Cost Object)

1. Run T-code: CATA
2. Fill in parameters:
 - Posting date/Post. Date for cancel: normally last day of the week
 - If across months, use 1st day of current month
3. Execute Test run
4. Verify 'No errors were found' shown at bottom
5. Click 'back' twice, untick Test Run
6. Execute Live run
7. Confirm "All data successfully transferred to CO"

6 To-Be Process (Automated)

6.1 Process Diagram

6.2 Process Description

This solution will automate the processing of timesheet, log in to the view, export timesheet, and then upload it to SAP.

The robot will:

Timesheet Upload Automation

- Check whether the current step has been completed
- Auto-login to View (<https://au.ap.tkelevator.com> / <https://nz.ap.tkelevator.com>)
- Navigate to Timesheet Report page
- Auto-select "Report to CATS" and time period (last Monday to Sunday)
- Click update cache and export Excel
- Auto-open report (select 'Don't Convert')
- Create new Excel file (copy template including AU raw data, timesheet working, Upload, Unallocated tabs)
- Paste CATS report data to raw data tab (AU)
- Copy data to AU timesheet working tab
- Auto-execute data filtering and cleaning:
 1. CATSHOURS is 0 → Move to Unallocated
 2. Delete rows where Column I/J and L/M have data
 3. Validate Network (10 digits) and Activity (4 digits) format
 4. Correct reversed data
 5. Fix Column M to 10 when Column L has data
 6. Filter blank items in Column I
 7. Filter blank and incorrect items, move non-compliant data to Unallocated tab
- Sum up CATSHOURS
- Copy finalized data to Upload tab
- Auto-login to SAP, run T-code: /TKET/FOT_UPLOADCATS
- Auto-handle popups (click Retry, Don't Update)
- Execute Test run
- Auto-filter Message column, identify error types:
 1. CG5K322200 → Auto-update ACTTYPE
 2. Missing labor costing → Move to Unallocated
 3. Other errors → Handle accordingly and move to Unallocated
- Loop until no errors
- Execute Live run
- Auto-verify processing results

Data Saving & Reporting

- Check whether the current step has been completed

- Save uploaded and unallocated data to SP
- Reflect in execution report/email:
 1. Hours posted
 2. Hours not posted
 3. Error types

Timesheet Approval Automation

- Check whether the current step has been completed
- Run T-code: CATS_APPR_LITE
- Auto-fill Company Code (AU:2223, NZ:2225)
- Execute report
- Auto-compare uploaded hours with hours to approve
- If variance exists, log exception:
 1. Hours approved
 2. Hours uploaded
 3. Variance amount
- Unapproved lines details
- Auto-select all and approve
- Send exception report if variance exists (does not block process)

Transfer to Job Automation

- Check whether the current step has been completed
- Run T-code: CATA
- Auto-calculate Posting date (last day of week, use 1st day of current month if across months)
- Execute Test run
- Verify 'No errors were found'
- Execute Live run
- Confirm "All data successfully transferred to CO"

Final Reporting

- Check whether the current step has been completed
- Run COFC report and export

Send Remind Mails

- Send success remind mail
- Send business exception remind mail
- Send system exception remind mail

6.3 Triggers

(7.00AM AEST) each Thursday.

6.4 Target Systems

Name	Description
VIEW	Download document
SharePoint	Upload data document
SAP	Upload data document and execute jobs

7 Process Details

7.1 Timesheet Upload – VIEW & Excel

7.1.1 Download Timesheet Report

Robot will download timesheet report from VIEW:

Exception	If VIEW portal login accounts expired, robot will send a business exception mail to RPA support team

7.1.2 Process and Filter Timesheet Data

Robot will process and filter timesheet data:

Step ID	002
----------------	-----

Key
stroke
level
steps

The image displays two screenshots illustrating the process of handling timesheet data.

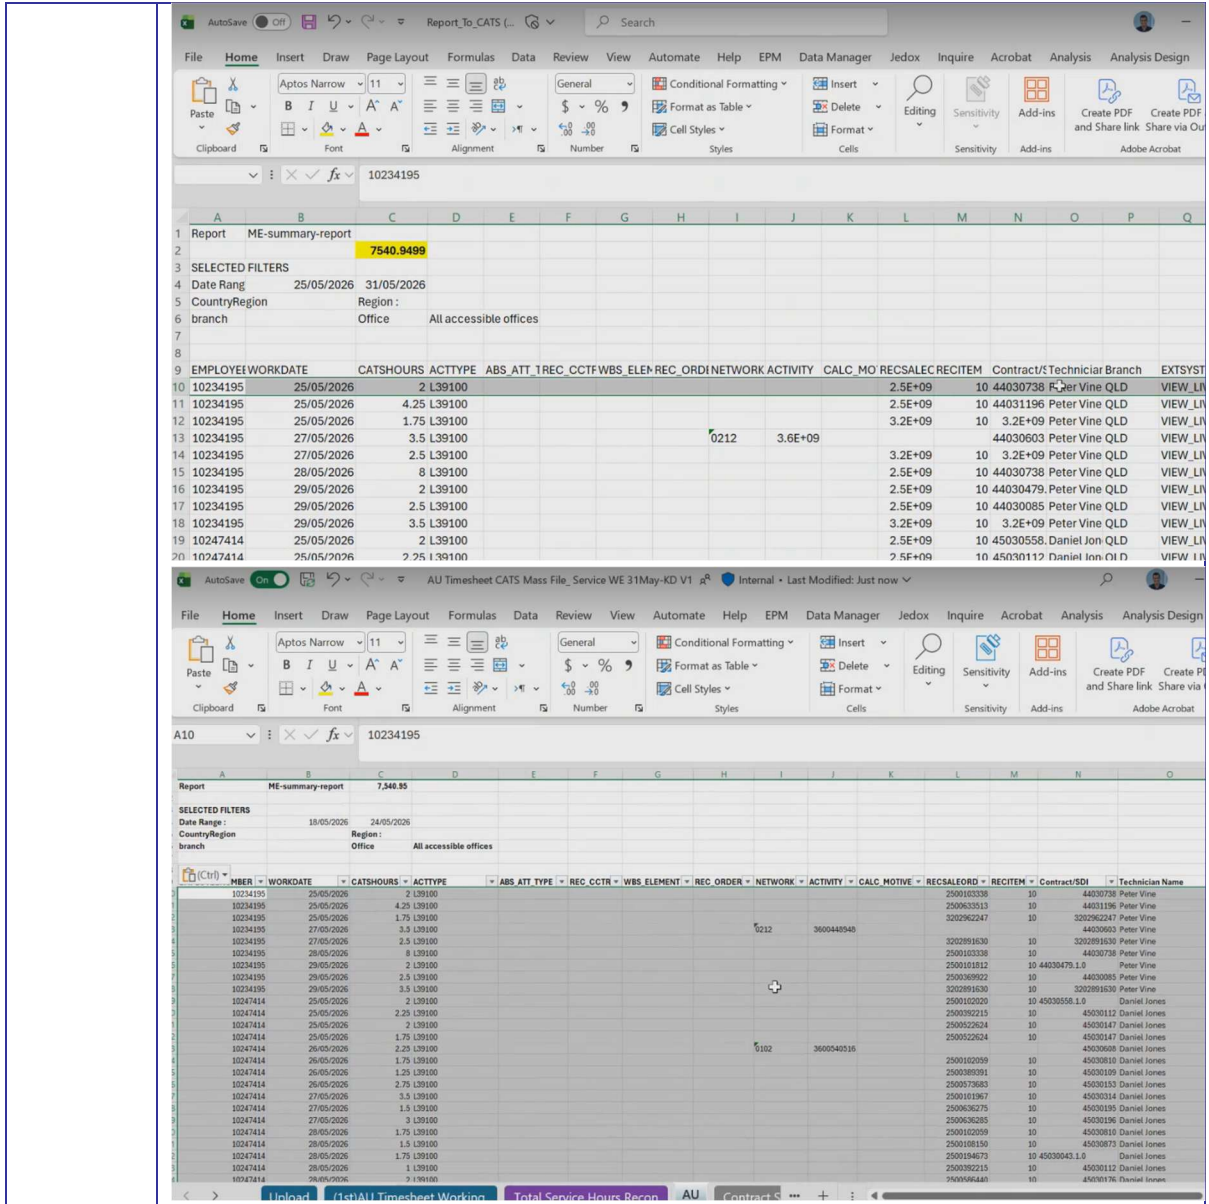

Top Screenshot: Microsoft Excel

The Excel spreadsheet is titled "Report_To_CATS (21)". It shows a summary report for "ME-summary-report" with a total value of 7540.9499. The "SELECTED FILTERS" section indicates a date range from 25/05/2026 to 31/05/2026, with the region set to "Office" and all accessible offices included. The main data table lists employee work dates, CATSHOURS, ACTTYPE, and various activity codes. Key data points include:

EMPLOYEE	WORKDATE	CATSHOURS	ACTTYPE	ABS_ATT_1	REC_CCTFWBS	ELEP	REC_ORDI	NETWORK	ACTIVITY	CALC_MO	RECSALEC	RECITEM	Contract/5	Technician	Branch

10247414	25/05/2026	1.75	L39100							2.5E+09		10 45030147	Daniel Jon	QLD	VIE
10247414	26/05/2026	2.25	L39100					0102	3.6E+09			45030608	Daniel Jon	QLD	VIE

Bottom Screenshot: Windows File Explorer

The File Explorer shows the "Timesheets" folder under "Accounts 2026". It lists various folders and files, including "1. Oct 2025", "2. Nov 2025", "3. Dec 2025", "4. Jan 2026", "5. Feb 2026", "6. Mar 2026", "7. Apr 2026", "8. May 2026", "9. June 2026", "Labour Rates", "Unallocated", "Report_To_CATS_27April to May 3", and "Timesheet User Guide V11-2025". The "9. June 2026" folder is selected, showing its contents: "View Reports" and "AU Timesheet CATS Mass File_Service WE 31May-KD V1".

The image displays two screenshots of Microsoft Excel spreadsheets. The top screenshot shows the 'Report_To_CATS' worksheet, which includes a summary report for employee 10234195 and a detailed timesheet for the period 25/05/2026 to 31/05/2026. The bottom screenshot shows the 'AU Timesheet CATS Mass File, Service WE 31May-KD V1' worksheet, which is a larger timesheet for the same employee, detailing work hours and activities across multiple dates.

The screenshots show the Microsoft Excel interface for a file named "AU Timesheet CATS Mass File_Service WE 31May-KD V1". The ribbon includes tabs for File, Home, Insert, Draw, Page Layout, Formulas, Data, Review, View, Automate, Help, EPM, Data Manager, Jedox, Inquire, Acrobat, Analysis, and Analysis Design. The Home tab is active, showing options for Clipboard, Font, Alignment, Number, and Styles.

Screenshot 1 (Top): The active cell is M1457. A context menu is open, showing options: Sort Smallest to Largest, Sort Largest to Smallest, Sort by Color, Sheet View, Clear Filter From "RECSALEORD", Filter by Color, and Number Filters. The Number Filters section is expanded, showing a search bar and a list of filters: 9999, 2033068, 5010725 (selected), 2500000000, 2500099290, and 5000000000.

Screenshot 2 (Middle): The active cell is M2879. The context menu is open, showing the same options as in the first screenshot. The Number Filters section is expanded, showing a search bar and a list of filters: 3202947417, 3202947681, 3202947722, 3202947723, 3202947743, 3202947744, 3202947810, 3202949554, 3202951627, 3202962247, 3202965162, and 3.050896+12 (selected). The (Blanks) filter is also checked.

Screenshot 3 (Bottom): The active cell is C41. The context menu is open, showing the same options as in the first screenshot. The Number Filters section is expanded, showing a search bar and a list of filters: 3202947417, 3202947681, 3202947722, 3202947723, 3202947743, 3202947744, 3202947810, 3202949554, 3202951627, 3202962247, 3202965162, and 3.050896+12 (selected). The (Blanks) filter is also checked.

	- Filter blank and incorrect items, move non-compliant data to Unallocated tab - Sum up CATSHOURS - Copy finalized data to Upload tab
Exception	N/A

7.2 Timesheet Upload – SAP & Data Saving

7.2.1 Upload Timesheet to SAP

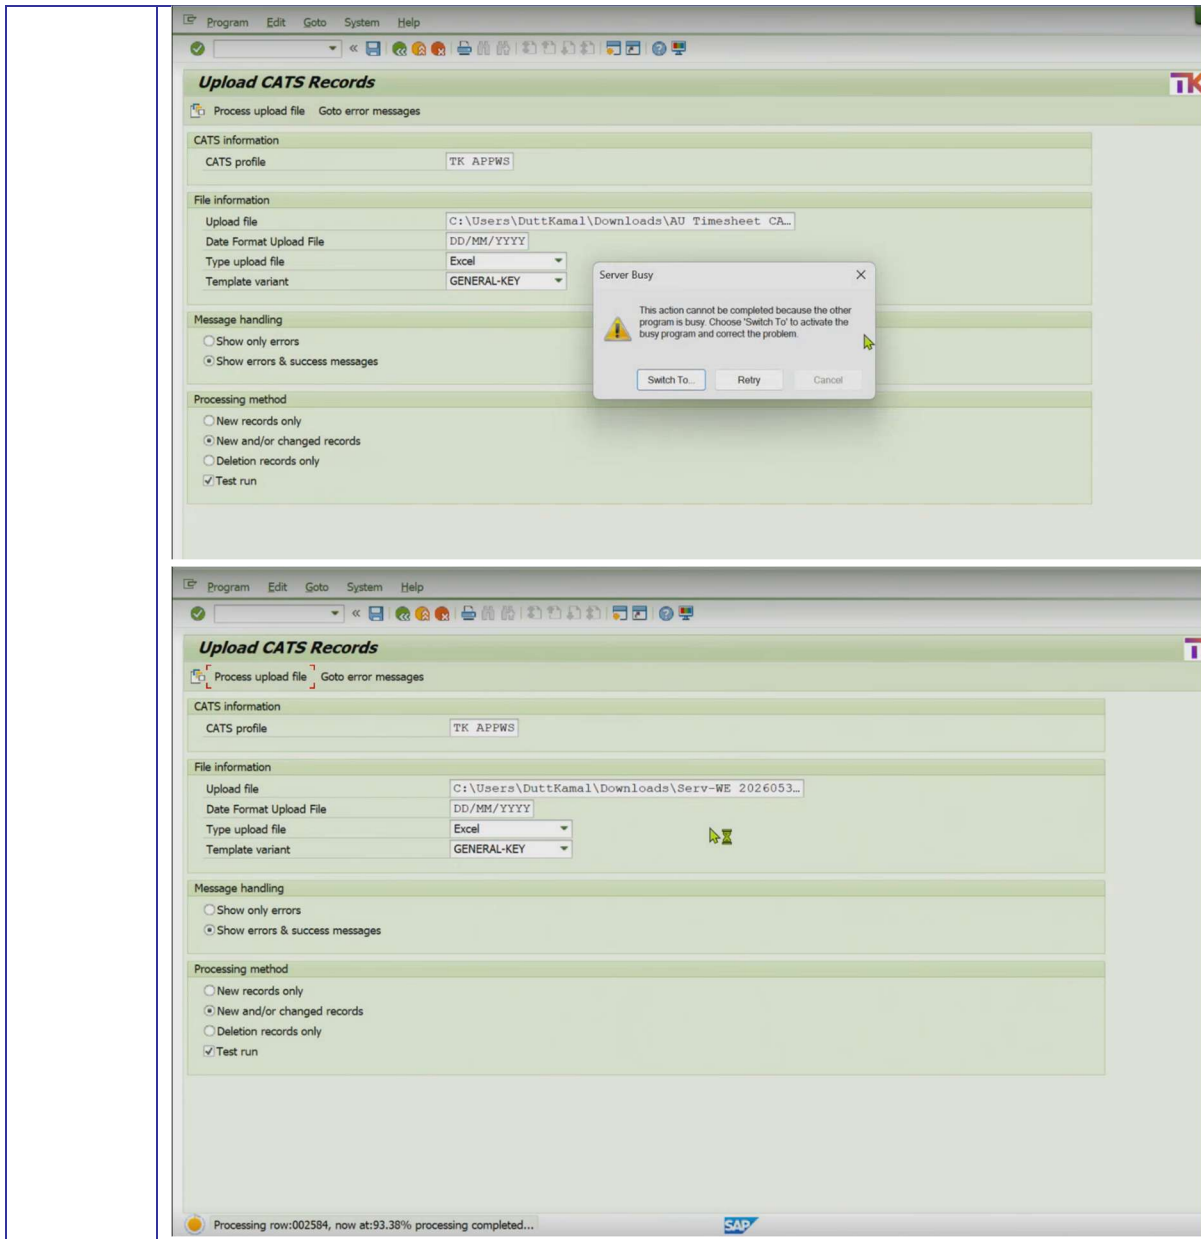

Robot will upload timesheet to SAP:

Step ID	003
Key stroke level steps	 

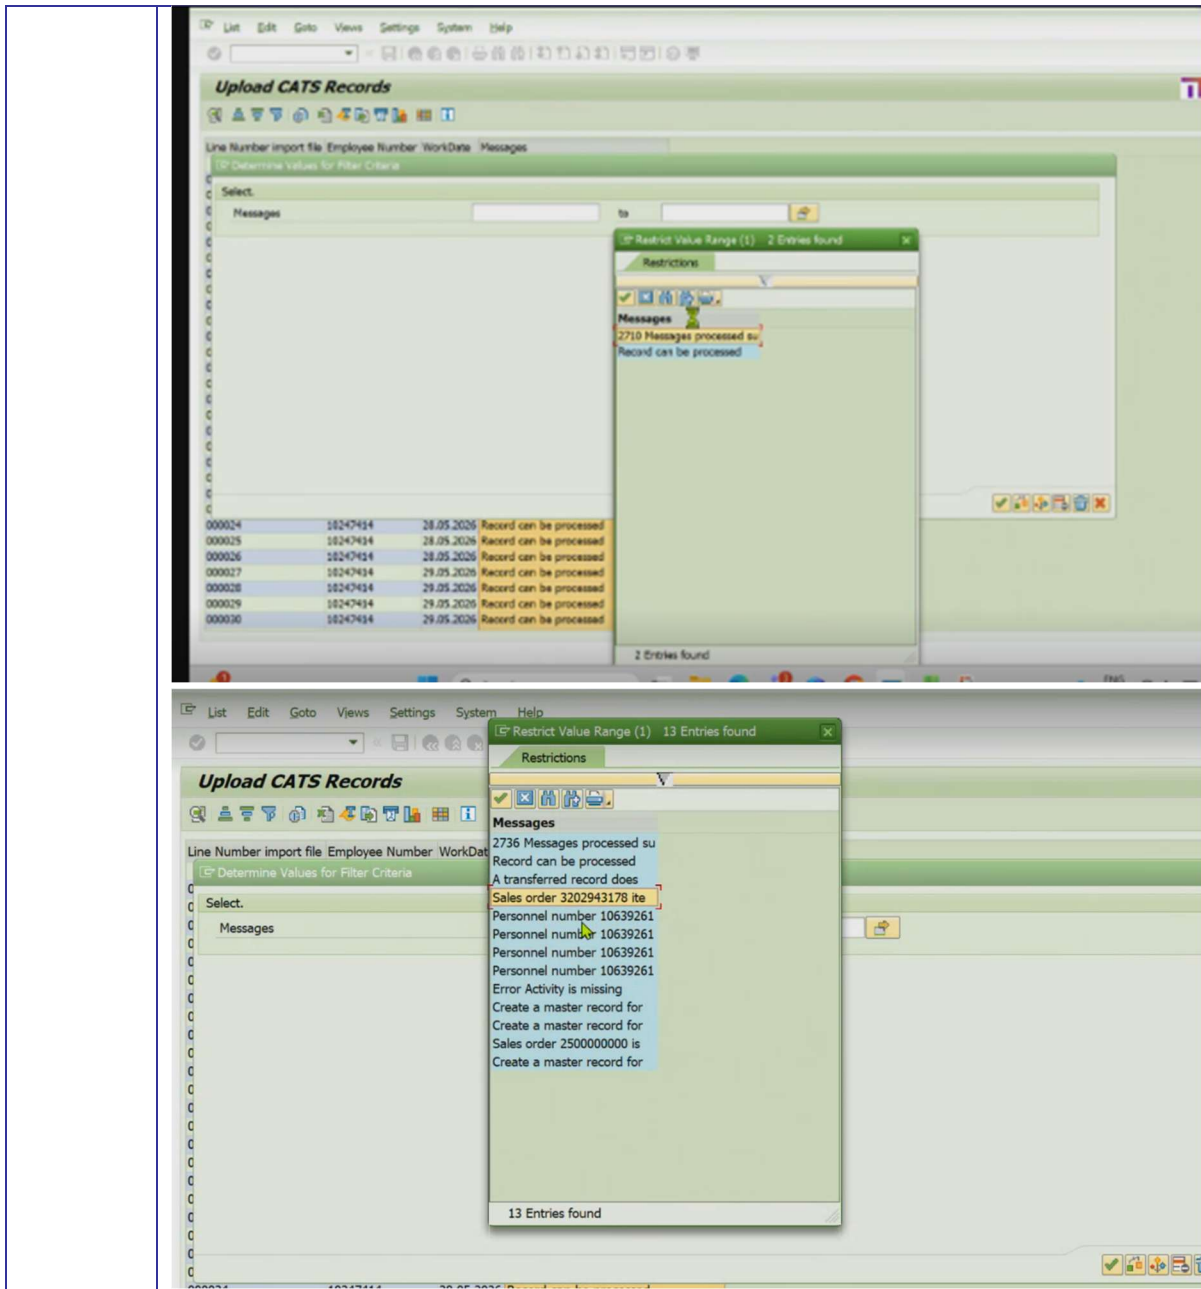

The image displays two screenshots of the SAP Easy Access interface. The top screenshot shows the 'SAP Easy Access' menu with a list of favorites. The 'Timesheet' folder is expanded, showing various transaction codes. The bottom screenshot shows the 'Upload CATS Records' transaction (T/TKET/FOT_UPLOADCATS) with the following fields and options:

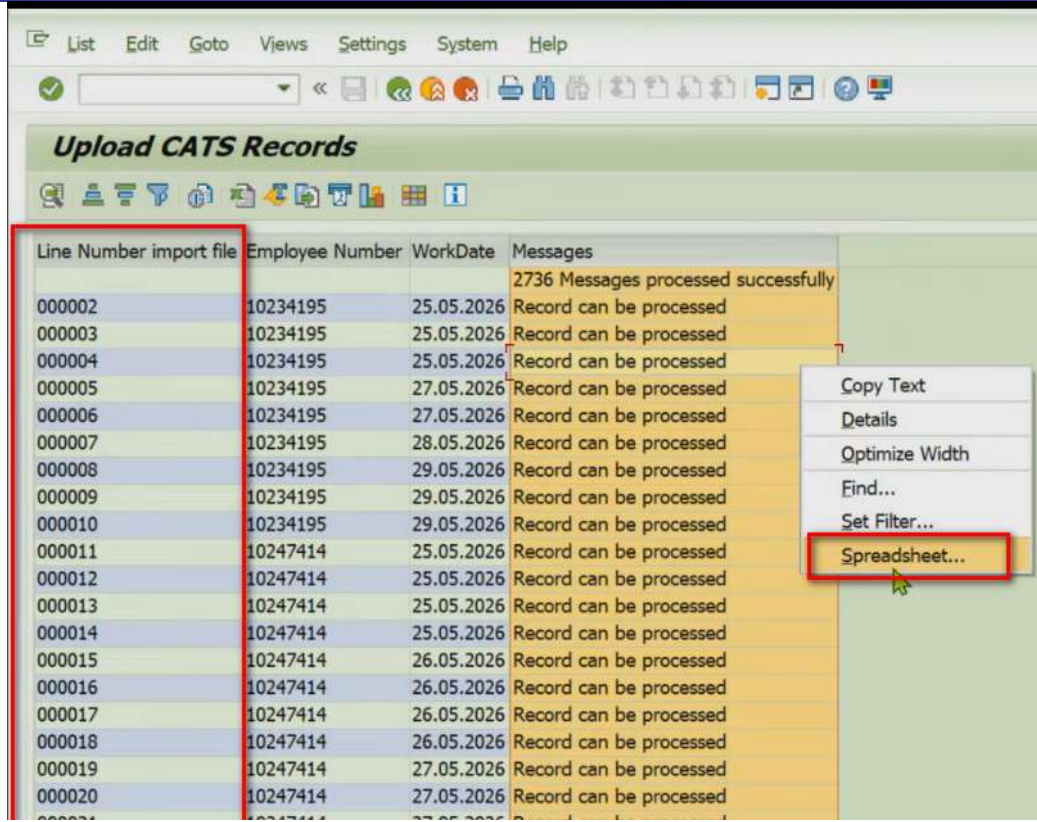

- CATS information**
 - CATS profile: TK APPWS
- File information**
 - Upload file: C:\Users\DuttKamal\Downloads\AU Timesheet CA...
 - Date Format Upload File: DD/MM/YYYY
 - Type upload file: Excel
 - Template variant: GENERAL-KEY
- Message handling**
 - ☐ Show only errors
 - ☒ Show errors & success messages
- Processing method**
 - ☐ New records only
 - ☒ New and/or changed records
 - ☐ Deletion records only
 - ☒ Test run

The top screenshot displays the 'Upload CATS Records' application window. The toolbar contains a filter icon (a funnel) which is highlighted with a red box. Below the toolbar, a table lists records with columns: Line Number, import file, Employee Number, WorkDate, and Messages. The Messages column contains the text '2736 Messages processed successfully' and 'Record can be processed' for each row.

The bottom screenshot shows the 'Determine Values for Filter Criteria' dialog box. The 'Messages' row is selected, and the 'to' field is highlighted with a red box. The 'Select.' field is empty.

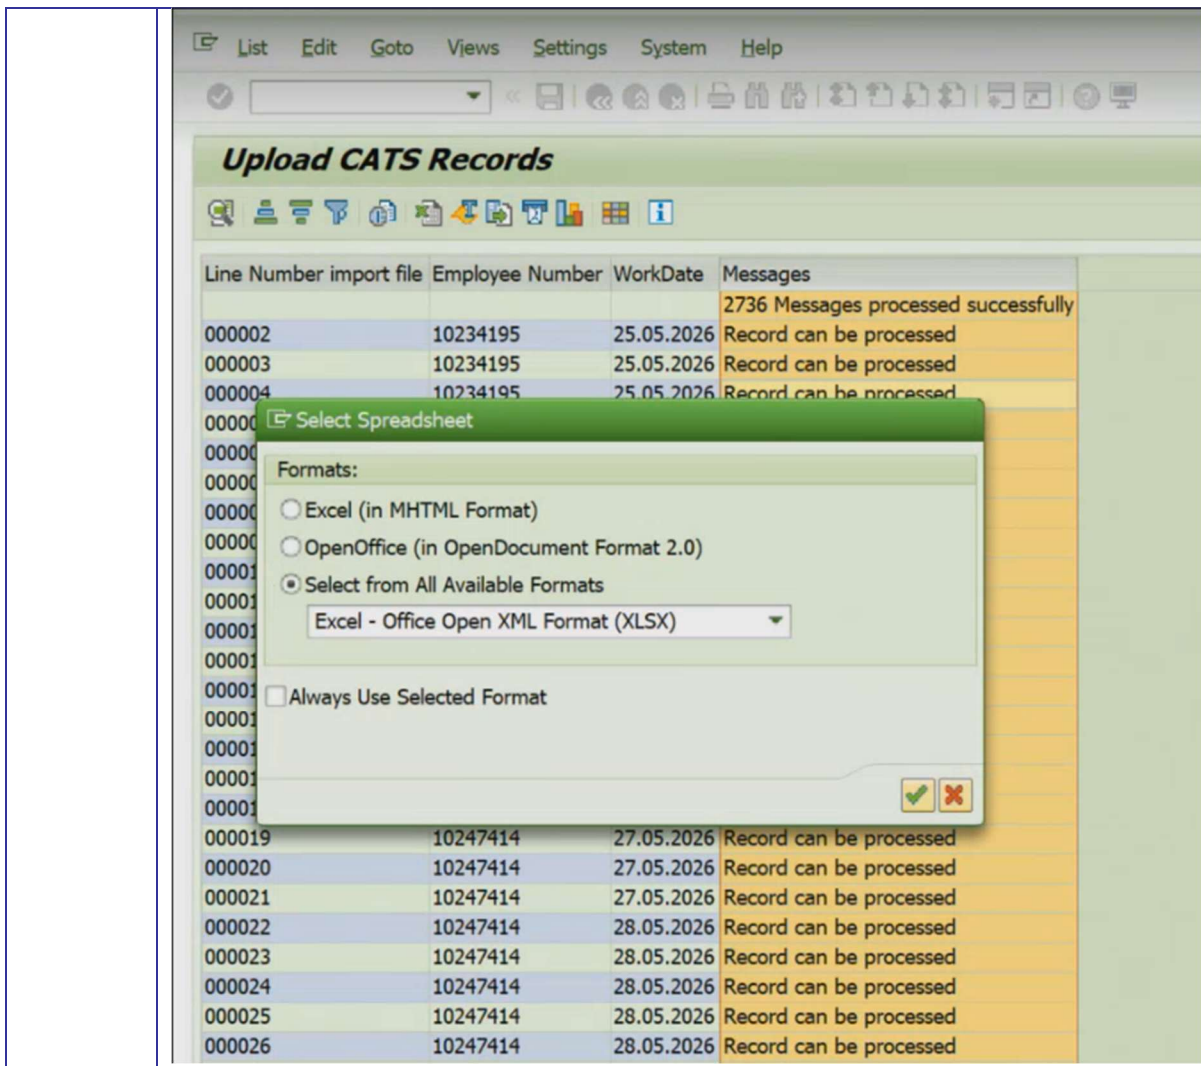

Upload CATS Records

000026 10247414 28.05.2026 Record can be processed

The screenshot displays two overlapping Excel windows. The top window, titled 'Serv-WE 20260531(error) - Excel', shows a spreadsheet with the following data:

Line Number import file	Employee Number	WorkDate	Messages
1			2736 Messages processed successfully
2	000002	10234195	25/05/2026 Record can be processed
3	000003	10234195	25/05/2026 Record can be processed
4	000004	10234195	25/05/2026 Record can be processed
5	000005	10234195	27/05/2026 Record can be processed
6	000006	10234195	27/05/2026 Record can be processed
7	000007	10234195	28/05/2026 Record can be processed
8	000008	10234195	29/05/2026 Record can be processed
9	000009	10234195	29/05/2026 Record can be processed
10	000010	10234195	29/05/2026 Record can be processed
11	000011	10247414	25/05/2026 Record can be processed
12	000012	10247414	25/05/2026 Record can be processed
13	000013	10247414	25/05/2026 Record can be processed
14	000014	10247414	25/05/2026 Record can be processed
15	000015	10247414	26/05/2026 Record can be processed
16	000016	10247414	26/05/2026 Record can be processed
17	000017	10247414	26/05/2026 Record can be processed
18	000018	10247414	26/05/2026 Record can be processed
19	000019	10247414	27/05/2026 Record can be processed
20	000020	10247414	27/05/2026 Record can be processed
21	000021	10247414	27/05/2026 Record can be processed

The bottom window, titled 'Serv-WE 20260531(error) Internal*', shows the same data with a 'Record can be processed' dialog box open. The dialog box contains a list of records and a 'Sort & Filter' pane on the right. The 'Sort & Filter' pane shows the following options:

- Sort A to Z
- Sort Z to A
- Sort by Color
- Sheet View
- Clear Filter From "Messages"
- Filter by Color
- Text Filters

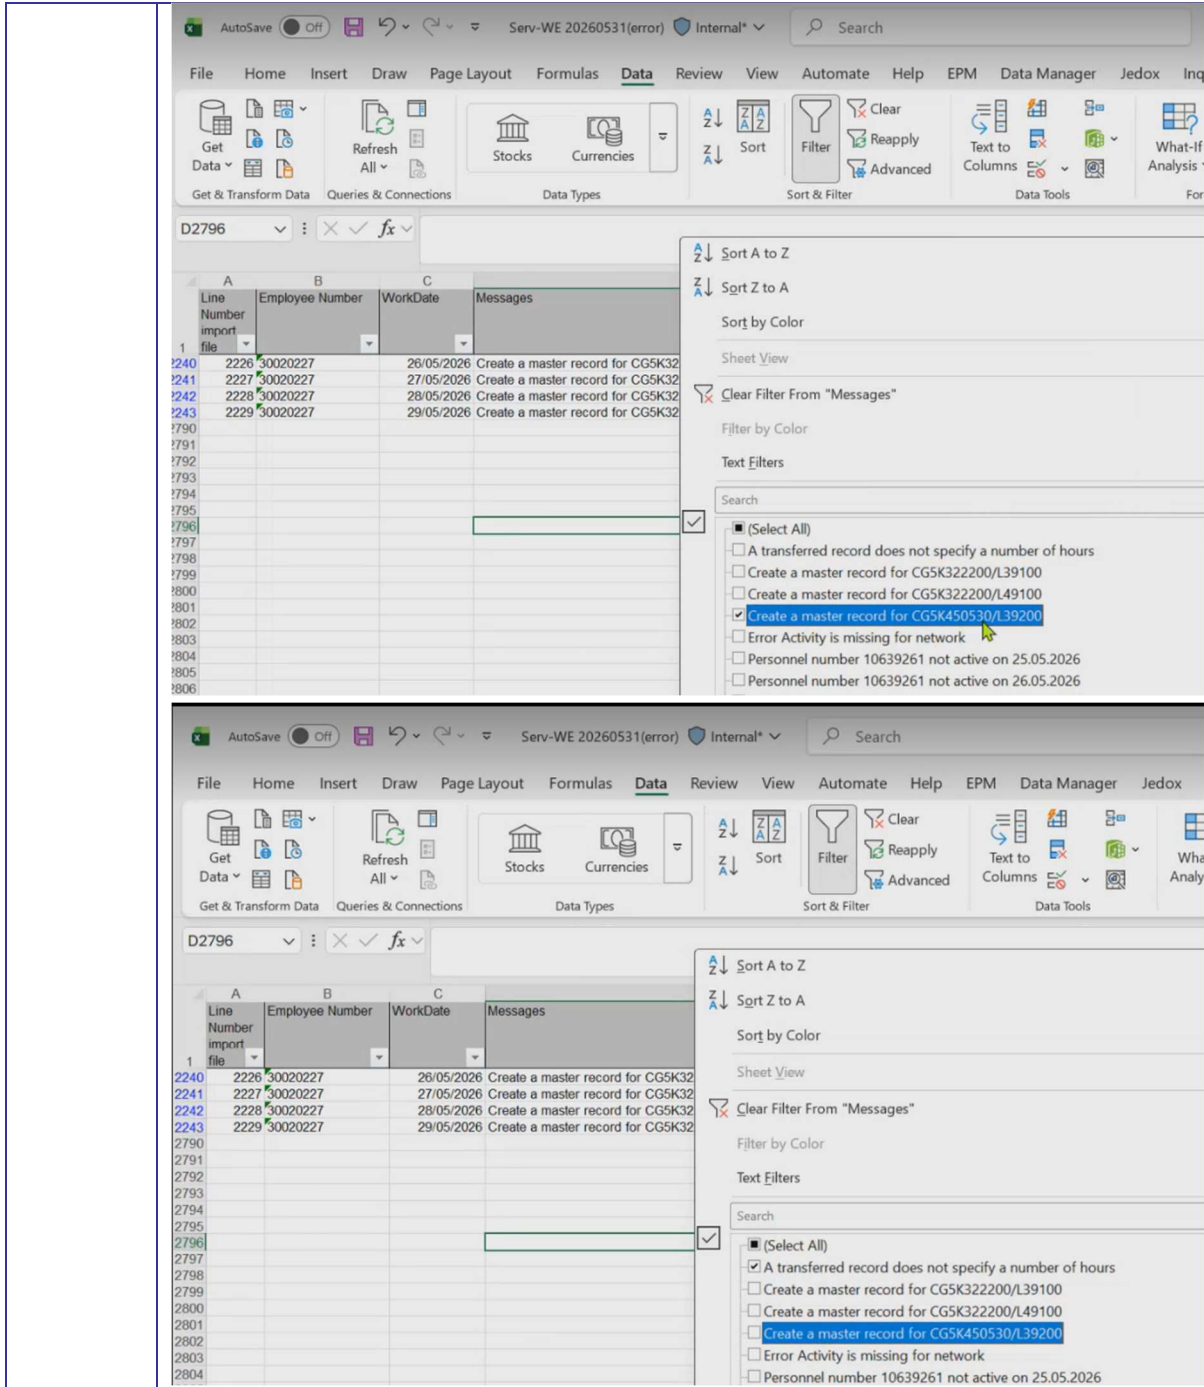

The 'Text Filters' pane shows the following options:

- (Select All)
- ☐ A transferred record does not specify a number of hours
- ☒ Create a master record for CGSK32200/L39100
- ☒ Create a master record for CGSK32200/L49100
- ☐ Create a master record for CGSK450530/L39200
- ☐ Error Activity is missing for network

The screenshot displays the Microsoft Excel interface with the 'Data' tab selected. The ribbon includes 'Get & Transform Data', 'Queries & Connections', 'Data Types', 'Sort & Filter', and 'Data Tools'. The 'Filter' button is active, opening a filter pane on the right. The data table has columns: Line Number, Employee Number, WorkDate, and Messages. The filter pane shows a search for 'Create a master record for CG5K450530/L39200' and a list of filter criteria.

Line Number	Employee Number	WorkDate	Messages
2240	2226	26/05/2026	Create a master record for CG5K322200/L39100
2241	2227	27/05/2026	Create a master record for CG5K322200/L49100

The image displays two screenshots. The top screenshot shows a Microsoft Excel spreadsheet with the 'Data' tab selected. The spreadsheet has columns: Line Number, Employee Number, WorkDate, and Messages. The 'Messages' column contains error messages. A filter pane is open on the right, showing a list of filters with checkboxes. The bottom screenshot shows a web application interface titled 'Upload CATS Records'. It includes sections for CATS information, File information, Message handling, and Processing method.

The bottom screenshot shows a web application interface for uploading CATS records. The interface includes a 'Process upload file' button, a 'Goto error messages' link, and a 'Server Busy' dialog box. The dialog box contains the following text:

Server Busy

This action cannot be completed because the other program is busy. Choose 'Switch To' to activate the busy program and correct the problem.

Buttons: Switch To..., Retry, Cancel

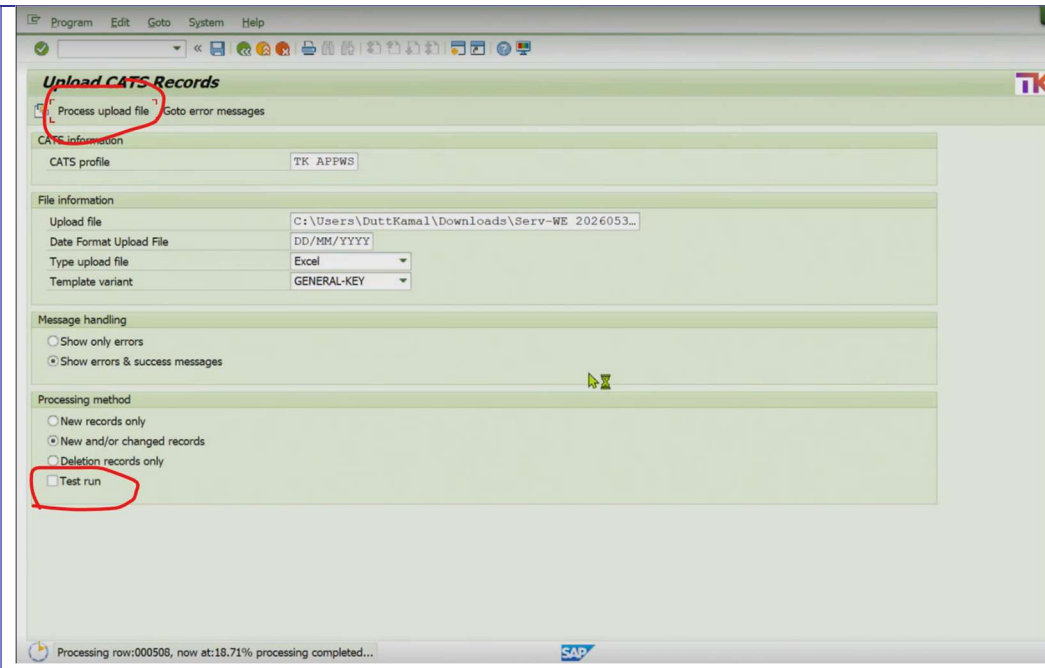

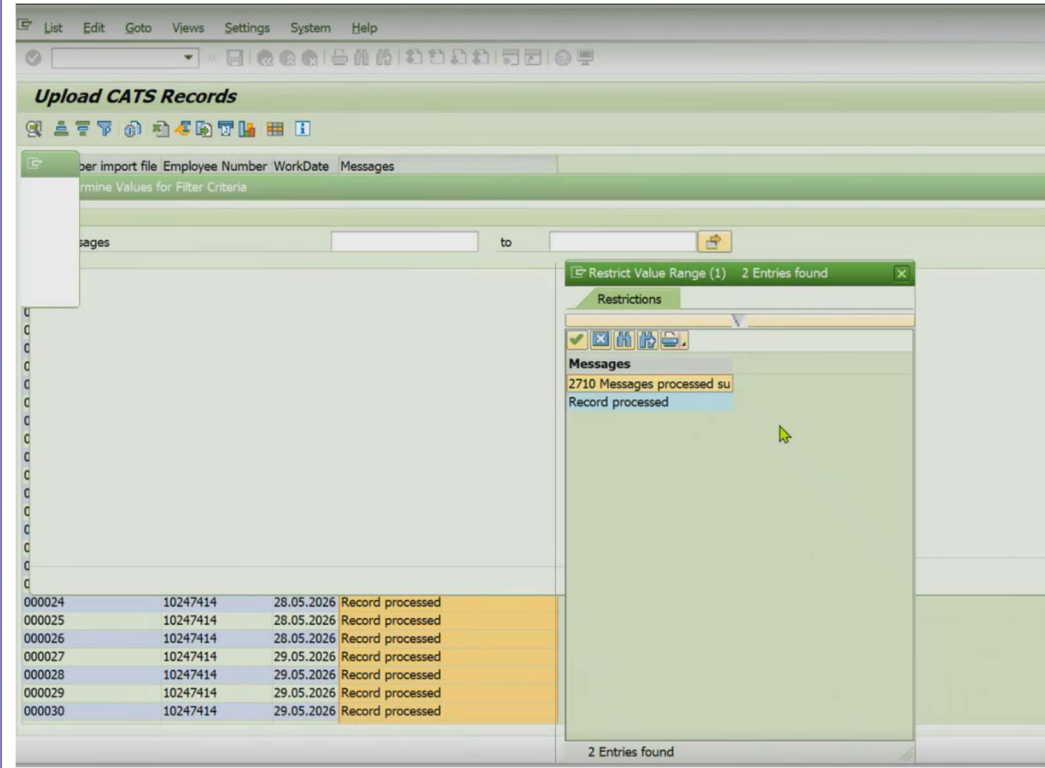

The screenshot displays the 'Upload CATS Records' application interface. The top section shows the upload configuration, including the CATS profile (TK APFWS), the upload file path (C:\USERS\DUTTKAMAL\DOWNLOADS\SERV-WE 2026053...), the date format (DD/MM/YYYY), the upload file type (Excel), and the template variant (GENERAL-KEY). The message handling options are set to 'Show errors & success messages'. The processing method is set to 'Test run'.

A Microsoft Excel warning dialog box is displayed over the configuration section, stating: 'This workbook contains links to one or more external sources that could be unsafe. If you trust the links, update them to get the latest data. Otherwise, you can keep working with the data you have.' The dialog has 'Update', 'Don't Update', and 'Help' buttons.

The bottom section shows the application's data table with columns: Line Number, import file, Employee Number, WorkDate, and Messages. The table contains three rows of data, all with the message 'Record can be processed'.

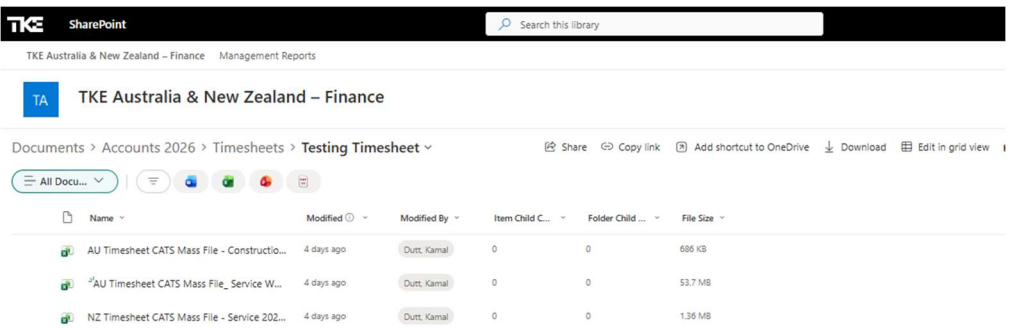

Line Number	import file	Employee Number	WorkDate	Messages
000024		10247414	28.05.2026	Record can be processed
000025		10247414	28.05.2026	Record can be processed
000026		10247414	28.05.2026	Record can be processed

	 
Condition OR Business Rule	Robot will: 1. Auto-login to SAP, run T-code: /TKET/FOT_UPLOADCATS 2. Fill in parameters and click Process upload file 3. Auto-handle popups (click Retry, Don't Update) 4. Execute Test run 5. Auto-filter Message column, identify error types: 6. CG5K322200 → Auto-update ACTTYPE 7. Missing labor costing → Move to Unallocated

	8. Other errors → Handle accordingly and move to Unallocated 9. Loop until no errors 10. Execute Live run 11. Auto-verify all data processed successfully
Exception	If upload errors cannot be resolved after retries, robot should record the message in execution summary report

7.2.2 Save Data to SharePoint

Robot will save uploaded and unallocated data to SharePoint:

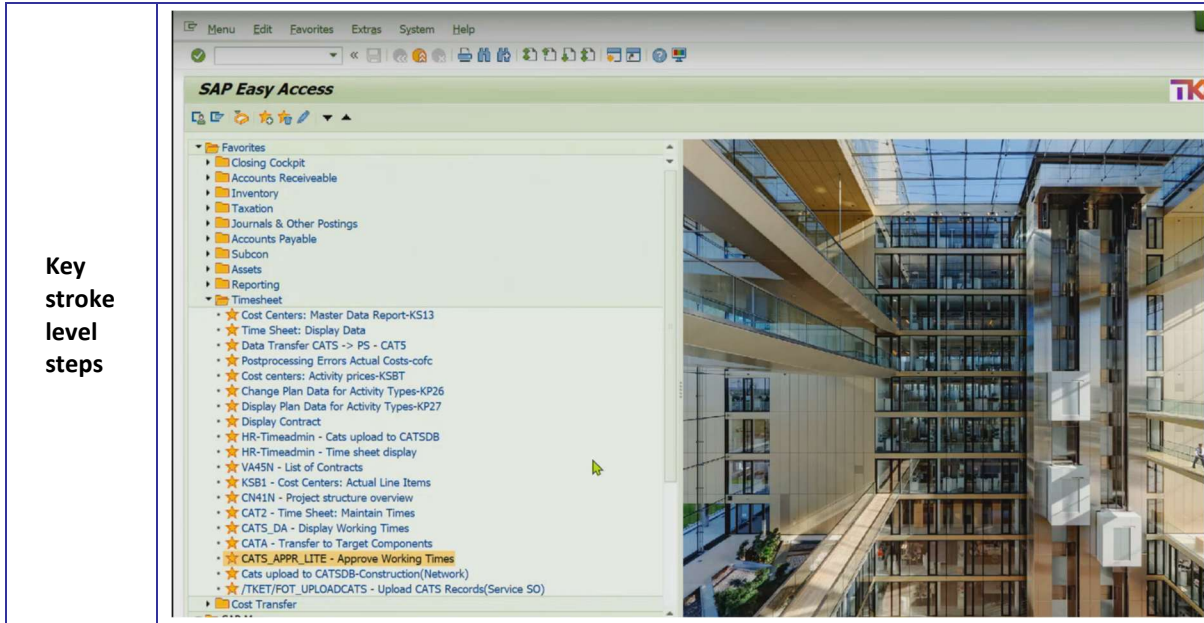

Step ID	004
Key stroke level steps	
Condition OR Business Rule	Robot will: 1. Save uploaded and unallocated data to SharePoint 2. Reflect in execution report/email: a. Hours posted b. Hours not posted c. Error types
Exception	N/A

7.3 Timesheet Approval

7.3.1 Approve Working Times

Robot will approve working times in SAP:

Step ID	005
----------------	-----

Condition OR Business Rule	
	
	Robot will: - Run T-code: CATS_APPR_LITE - Auto-fill Company Code (AU: 2223, NZ: 2225) - Execute report - Auto-compare uploaded hours with hours to approve - If variance exists, log exception: - Hours approved - Hours uploaded - Variance amount - Unapproved lines details - Auto-select all and approve

	8. Send exception report if variance exists (does not block process)
Exception	If hours variance exceeds acceptable threshold (1-2 hours), robot should log warning in execution summary report

7.4 Transfer to Job & Final Reporting

7.4.1 Post to Cost Object

Robot will transfer timesheet to cost object:

Step ID	006
Key stroke level steps	 The screenshot shows the SAP Easy Access menu. The 'Timesheet' folder is expanded, and the 'CATA - Transfer to Target Components' option is highlighted. Other visible options include 'Cost Centers: Master Data Report-KS13', 'Time Sheet: Display Data', 'Data Transfer CATS -> PS - CATS', 'Postprocessing Errors Actual Costs-cofc', 'Cost centers: Activity prices-KSBT', 'Change Plan Data for Activity Types-KP26', 'Display Plan Data for Activity Types-KP27', 'Display Contract', 'HR-Timeadmin - Cats upload to CATSDB', 'HR-Timeadmin - Time sheet display', 'VA45N - List of Contracts', 'KS81 - Cost Centers: Actual Line Items', 'CN41N - Project structure overview', 'CAT2 - Time Sheet: Maintain Times', 'CATS_DA - Display Working Times', 'CATS_APPR_LITE - Approve Working Times', 'Cats upload to CATSDB-Construction(Network)', and '/TKET/FOT_UPLOADCATS - Upload CATS Records(Service SO)'.

The screenshot shows the SAP CATS: Transfer to Controlling interface. The menu bar includes List, Edit, Goto, Settings, Extras, System, and Help. The toolbar contains various icons for navigation and actions. The main area displays the following statistics:

No. of records containing errors: 0
No. of records read: 2,641
No. of records saved successfully: 2,641

Below the statistics is a table with columns: Rev, Pers.No., Date, Doc. no., Message ID, Msg.no., and Message text. The table lists 9 records, all with status 'S' and 'BK', indicating no errors.

Rev	Pers.No.	Date	Doc. no.	Message ID	Msg.no.	Message text

At the bottom, a status bar indicates "No errors were found" with a green checkmark icon. The SAP logo is visible in the bottom right corner.

The screenshot shows the 'CATS: Transfer to Controlling' window in SAP. The menu bar includes List, Edit, Goto, Settings, Extras, System, and Help. The toolbar contains various icons, including a red circle around the 'Transfer' icon. The window displays the following statistics:

No. of records containing errors: 0
No. of records read: 2,641
No. of records saved successfully: 2,641

Condition OR Business Rule	Robot will: - The execution summary report will be generated when the process execute completed - There are 3 execution status: - Success - Warning (With business exception) - Failed (With system exception) - The file name should be "Job Timesheet Processing Execution Summary Report (yyyyMMdd).xlsx"																																				
Exception	N/A																																				

7.5.2 Success Remind Mail

Robot will send success remind mail if the process executes without any errors:

Step ID	009-01
----------------	--------

Key stroke level steps	 Success Dear all, <P_AP_ANZ_003_056_JobTimesheetProcessing> automation process trigger succeed. Job Timesheet Processing maintain completed, more execution details please refer to the attachment. Success = 1 items Warning = 0 items Failed = 0 items (Please note this email is auto-generated by TKE AP Robot. Please do not reply to this email)
Condition OR Business Rule	Robot will send success remind mail: 1. Mail Subject: [RPA-Success] Job Timesheet Processing - Execute Success 2. Attachment: Job Timesheet Processing Execution Summary Report (yyyyMMdd).xlsx 3. To: Key users 4. Cc: RPA support team
Exception	N/A

7.5.3 Business Exception Remind Mail

Robot will send business remind mail if process executes with business exception:

Step ID	009-03
Key stroke level steps	 Warning Dear all, <P_AP_ANZ_003_056_JobTimesheetProcessing> automation process execute failed with business exception, please check the follow exception. Login View platform failed. (Please note this email is auto-generated by TKE AP Robot. Please do not reply to this email)
Condition OR Business Rule	Robot will send business exception remind mail: 1. Mail Subject: [RPA-BusinessException] Job Timesheet Processing - Execute With Business Exception 2. To: RPA support team

	3. Cc: N/A
Exception	N/A

7.5.4 System Exception Remind Mail

Robot will send system exception remind mail if process executes with system exception:

Step ID	009-04
Key stroke level steps	 Error Dear all, <P_AP_ANZ_003_056_JobTimesheetProcessing> automation process trigger failed, please check by follow details information. Process Name: P_AP_ANZ_003_056_JobTimesheetProcessing Exception Date: 2024/01/01 Exception Type: UI elements not found Exception Details: UI elements not found (Please note this email is auto-generated by TKE AP Robot. Please do not reply to this email)
Condition OR Business Rule	Robot will send system exception remind mail: 1. Mail Subject: [RPA-SystemException] Job Timesheet Processing - Execute With System Exception 2. To: RPA support team 3. Cc: N/A
Exception	N/A

8 Exceptions

8.1 Business Exceptions

1. No timesheet data require to operate (no CATS report data downloaded for the processing period), robot will send a business exception mail to key users and cc RPA support team.
2. If Network or Activity format is invalid (Network $\neq$ 10 digits, Activity $\neq$ 4 digits, or Column I/J and L/M contain conflicting data), robot should move the row to Unallocated tab and record the message in execution summary report.
3. If SAP upload returns CG5K322200 error, robot should auto-update ACTTYPE and retry; if still unresolved after retry, robot should record the message in execution summary report.
4. If SAP upload returns missing labor costing info error, robot should remove the row from Upload file, move to Unallocated tab, and record the message in execution summary report.
5. If CATSHOURS is 0 in Upload tab, robot should remove the row from Upload file, move to Unallocated tab, and record the message in execution summary report.

6. If other SAP upload error types occur, robot should handle accordingly, move to Unallocated tab where applicable, and record the error type in execution summary report.
7. If upload errors cannot be resolved after retries, robot should record the message in execution summary report.
8. If uploaded hours and approved hours do not match (variance exceeds acceptable threshold of 1–2 hours), robot should log warning in execution summary report and send exception report to user (does not block approval process).
9. If unapproved lines are identified during Timesheet Approval, robot should record line details (hours approved, hours uploaded, variance amount, unapproved lines) in execution summary report.

*Robot will ignore the item occurred business exception and skip to next transaction item

8.2 Technical Exceptions

1. If the operation element not found, robot will record error message to “Job Timesheet Processing Execution Summary Report (yyyyMMdd).xlsx”.
2. If there is a delay in logging web applications (VIEW / SAP), robot will retry 2 times (interval 1 min).
3. If SAP or application popup appears during upload (e.g. Retry, Don’t Update), robot will auto-handle popups and retry as per business rule.
4. If system exception occurs during process execution, robot will send system exception remind mail to RPA support team.

*Robot will retry 2 times for the item occurred system exception

10 SOD Conflict Checks

10.1 Evaluate SoD on process level

Evaluation Check points	Response
-------------------------	----------

Does the process being designed affect one of the attached systems? If not, no further checks are needed. If yes, please consider below questions.	N/A
In the relevant system, does the process include more than one activity (e.g., more than one T-Code being executed in SAP environments)? If not, no further checks are needed. If yes, please consider below questions.	N/A
Are the performed activities related to the modification of data or is it read only activities? If none or only one activity is modifying data, no further checks are needed. If it is two or more activities, please consider below questions.	N/A
If two or more activities are related to the modification of data, please list these activities and contact the respective system owner for conducting simulations and confirming that the activities are conflict free.	N/A

(Note: The confirmation of the system owner and SoD simulation result should be attached.)

10.2 Evaluate SoD between process and requestor.

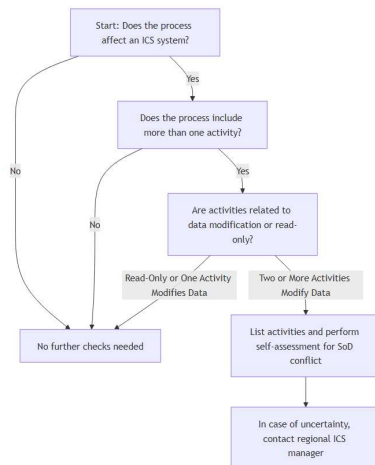

Evaluation Check points	Response
Does the requestor of the process have access to the same (relevant) system in which the process is operating? If not, no further checks are needed.	N/A
Does the requestor have the same access rights as used in the process? If yes, no further checks are needed.	N/A
In case of different or additional access rights, please list them and contact the respective system owner for conducting simulations and confirming that the activities are conflict free.	N/A

(Note: The confirmation of the system owner and SoD simulation result should be attached.)

10.3 Result

Evaluation Result	Response
Is the Process SOD conflict-free (also in combination with the requestor's access rights in the target system)? Yes/No/NA (For non ICS critical applications.)	N/A
